

Inboard Drum Brake Axle for Trucks and Trailers

This inboard drum brake axle series is engineered for heavy-duty applications, offering both reliable performance and durability. The axle series features an inboard drum brake system, providing enhanced braking efficiency and reduced maintenance.

Overview

Heavy-Duty Inboard Drum Axle

The Inboard Drum Brake Axle Series is engineered for heavy-duty applications, providing reliable performance and durability for commercial vehicles. Featuring an inboard drum brake system, this axle offers enhanced braking efficiency and reduced maintenance requirements. Constructed from high-strength materials, it is designed to withstand demanding operating conditions and heavy loads, making it suitable for trucks and trailers.

Technical Specifications

Recommended Wheel Rims

- 22.5*11.75
- 7.5V-20
- 8.0V-20

Key Performance Metrics

13 ton

Max Capacity

Axle Dimensions and Configuration

Parameter	Specification
Axle Beam	150mm
Brake System	Inboard Drum

Compatible Bearings

33213, 33118
