

Incandescent Light Bulb

This incandescent light bulb provides illumination via a heated filament. It is available in clear and frosted glass options for different lighting effects.

Overview

Classic Incandescent Lighting

These standard incandescent light bulbs are designed for versatile residential and commercial lighting applications. Available in both clear and frosted glass finishes, they offer options for direct, bright illumination or softer, diffused light. With a range of base types and voltage compatibility, these bulbs are suitable for various fixtures and global electrical standards.
