

Inclinable Power Press

This inclinable power press is a robust mechanical press used for various metal forming tasks. Its rigid frame construction ensures precision in stamping, punching, blanking, bending, and forming operations.

Product Overview

J23 Series Inclinable Power Press

The J23 series is a versatile open-back inclinable press designed for efficient metal forming operations. It features a robust, simple structure that ensures reliable performance and ease of operation for a variety of industrial tasks. With specialized configurations available, including safety-focused models with emergency braking and advanced pneumatic systems, this press series offers flexibility for demanding production environments.

Technical Specifications

Safety Features

Emergency Brake • Photoelectric Protector Compatible

Model Specifications

Model	Nominal Force (KN)
JC23-6.3	63
J23-10B	100
J23-16	160
J23-16B	160
J23-25A	250
JG23-35A	350
JG23-40A	400
JC23-63A	630

Clutch System

Rigid Clutch, Rolling Clutch, Pneumatic Friction Clutch

Design Features

J23-100B Model Highlights

- Cast iron body
- Longitudinal crankshaft
- Eccentric sleeve adjustable stroke
- Pneumatic friction clutch
- Working stability
- Small shock
