

Index Shifting Bicycle Rear Derailleur with Claw Hanger

This bicycle rear derailleur is a crucial component for shifting gears on a multi-speed bicycle. It is designed for index shifting, ensuring reliable gear changes, and includes an adjustment screw for fine-tuning.

Product Overview

High-Performance Rear Derailleur

This index-shifting rear derailleur is engineered for smooth and precise gear transitions on multi-speed bicycles. Designed for compatibility with 18 to 21-speed drivetrains, it offers reliable performance for daily commuting and recreational riding. The unit features a durable metal construction and includes a claw hanger for straightforward frame mounting.

Technical Specifications

Shifting Mechanism

Index Shifting

Drivetrain Compatibility	18-21 Speed
--------------------------	-------------

Maximum Sprocket Size	43 T
