Overview

Professional Indirect Heating Solution

This portable indirect fired space heater is engineered for demanding environments where clean, dry, and fume-free heat is essential. Designed with a robust frame and integrated wheels, it offers excellent maneuverability for use on construction sites, in workshops, and across agricultural facilities. The unit ensures efficient air circulation and consistent warmth, making it a reliable choice for large-scale industrial and commercial heating needs.

Performance Metrics

Heat Input

100 kW
Heat Input

Fuel Consumption

8.5 l/h

Technical Specifications

Voltage	AC 230-240V 50Hz 1 Ph
Motor Power	1.1 kW
Motor Current	5.2 A
Tank Capacity	24 l

Compliance & Features

Key Features

- Portable design with wheels
- Robust frame construction
- Protective fan cage
- Clean and dry air output

Certifications

CE
