

Indoor Amplified HDTV Antenna with Circular Mesh Reflector

This indoor amplified HDTV antenna receives over-the-air digital TV signals. It has a circular mesh reflector and adjustable dipoles to enhance signal reception and supports 1080p and 4K resolutions.

Product Overview

High-Definition Indoor Reception

This amplified indoor HDTV antenna provides a reliable solution for capturing over-the-air digital television signals. Equipped with a circular mesh reflector and adjustable dipoles, it is engineered to optimize reception across both VHF and UHF frequency bands. The integrated signal amplifier further enhances performance to deliver clear 1080p and 4K broadcast quality for your viewing experience.

Technical Specifications

Supported Resolutions	1080p, 4K
Power Source	External AC Adapter
Mounting/Placement	Tabletop

Key Features

Signal Technology

- Built-in signal amplifier
- Circular mesh reflector
- Adjustable VHF/UHF dipoles
