

Indoor Amplified VHF/UHF TV Antenna

This indoor amplified TV antenna is designed to receive VHF and UHF signals, providing high-quality reception for over-the-air broadcasts. The built-in amplifier boosts weak signals, improving picture and sound quality.

Product Overview

High-Performance Signal Reception

This indoor amplified TV antenna is engineered to deliver reliable VHF and UHF signal reception for crisp high-definition broadcasts. Designed for versatility, it features a circular mesh reflector and adjustable dipole antennas that ensure optimal signal capture in various indoor environments. The integrated signal amplifier enhances weak broadcast signals, significantly improving overall picture and audio fidelity for your home or office.

Technical Specifications

Compatible Signals	VHF, UHF
Signal Amplification	Yes
Tuning Capability	Fine-tuning knob for manual signal optimization

Connectivity

Output Interface	Coaxial cable output
------------------	----------------------

Design Features

Components

- Circular mesh reflector
- Adjustable dipole antennas
- Integrated signal amplifier
- Manual tuning knob

Application

Recommended Use

Homes • Apartments • Offices
