

Indoor Ceiling Fan with Integrated Light

This indoor ceiling fan provides both air circulation and illumination. It features a three-blade design and an integrated light fixture with a frosted shade.

Product Overview

Modern Indoor Comfort Solution

This indoor ceiling fan features a sophisticated three-blade aerodynamic design engineered to maximize airflow efficiency in residential or professional indoor environments. With an integrated light fixture housed in a frosted shade, the unit offers a dual-functionality solution that provides both effective air circulation and soft, diffused illumination. The durable construction and streamlined mounting system make it a versatile choice for a wide range of interior ceiling applications.

Technical Specifications

Blade Design	3-Blade Aerodynamic
Integrated Light	Frosted shade fixture

Installation Details

Environment	Indoor Use Only
Mounting Method	Downrod, Canopy Mount
