

Indoor Ceiling Fan with Light

This indoor ceiling fan provides both illumination and air circulation. In summer, clockwise rotation creates a wind chill effect, offering a thermoelectric cooling sensation.

Product Overview

Comfort and Efficiency

This indoor ceiling fan combines effective air circulation with integrated lighting to enhance your living space. By creating a wind chill effect, it helps manage indoor temperatures, allowing you to reduce air conditioning usage and save significantly on energy costs. Its design features a stylish dark bronze finish and warm wood-toned blades, making it a functional and aesthetic addition to any room.
