

Indoor Gas Space Heater

This gas heater is designed for indoor heating purposes. It utilizes gas fuel and features a protective grill for safety, along with control knobs for adjusting heat output.

Product Overview

Efficient Indoor Heating Solution

This gas-powered space heater is designed to provide reliable, supplemental warmth for residential and small office environments. Its compact, rectangular design ensures it can be easily positioned in various spaces, while the integrated protective grill prioritizes user safety during operation. Featuring intuitive control knobs, users can effortlessly adjust the heat output to maintain a comfortable climate.

Technical Specifications
