Product Overview

Advanced Indoor Inhalation Mosquito Trap

This indoor mosquito trap utilizes advanced 365nm UV-LED inhalation technology to effectively attract and capture insects without the need for harmful chemicals. Featuring an intelligent design with a funnel-shaped trap mechanism, it prevents mosquitoes from escaping once captured, ensuring high elimination rates. The device offers user-friendly operation through a touch-sensitive control panel, allowing for customizable timer settings to suit your environment.

Technical Specifications

Light Source	365nm UV-LED
Power Input	USB Universal Adapter

Features

Timer Options

- 4 Hours
- 6 Hours
- 12 Hours
- Continuous Operation

Safety Features

Intelligent Power Shutdown, Chemical-Free, Safe for Indoor Use

Design

Trap Mechanism	Funnel-shaped inhalation design
Control Interface	Touch-sensitive switch
