

Indoor Network Surveillance Camera

This indoor network surveillance camera is designed for indoor surveillance and network communication applications. It supports remote viewing and control capabilities with high-resolution video capture and low-light performance.

Product Overview

Professional Indoor Surveillance

This compact network surveillance camera is engineered for reliable indoor monitoring and communication. Featuring a discreet dome-shaped design with a protective cover, it integrates seamlessly into office or commercial environments. The device supports high-resolution video capture and advanced low-light performance, ensuring clear visibility for security and remote viewing applications.

Key Features

Core Capabilities

High-Resolution Video, Low-Light Performance, Remote Viewing, Network Connectivity

Technical Specifications

Connectivity

- Ethernet
- Wi-Fi

Usage Environment

Indoor • Surveillance • Network Communication

Design

Dome-shaped with protective cover

Installation

Stand-mounted
