

Indoor Pan and Tilt Security Camera

This indoor security camera is designed for comprehensive security and monitoring. It features pan and tilt functionality, high-definition video recording, and two-way audio communication.

Overview

Versatile Indoor Security Monitoring

This indoor pan and tilt camera provides comprehensive 350-degree horizontal and 90-degree vertical coverage, ensuring no blind spots in your monitoring area. Equipped with a 1080P HD lens, it delivers crystal-clear video with intelligent motion tracking and two-way audio for effective communication. The device offers flexible storage options through both local microSD cards and cloud services, making it a reliable solution for professional security needs.
