

Indoor Pan and Tilt Security Camera

This high-definition security camera is designed for indoor monitoring. It features pan and tilt functionality, wireless connectivity and remote viewing capabilities.

Overview

Smart Indoor Surveillance

This high-definition indoor pan and tilt security camera offers comprehensive monitoring for residential or commercial spaces. Equipped with advanced AI features like human figure and face detection, it ensures reliable security alerts. With seamless Wi-Fi connectivity, two-way audio, and efficient H.265 video compression, it provides a user-friendly and bandwidth-saving surveillance solution.
