

# Indoor Sensor Light with BNC Connectors and Digital Display

This indoor sensor light is designed for illumination systems. It features multiple BNC connectors, a digital display, and a keypad for control.

## Overview

### Professional Indoor Illumination Control

This advanced indoor sensor light is designed for precision illumination workstations and specialized lighting environments. Featuring an integrated digital display and responsive keypad control, it offers operators granular management over light sensing parameters. Equipped with multiple BNC connectors, the system ensures seamless integration into existing professional monitoring and control infrastructure.

## Technical Specifications

### Control Interface

- Digital Display
- Tactile Keypad

Interface Connectors	BNC
Primary Application	Indoor Fluorescence Workstation
Model Series	GW5000F-AA
