

Indoor TV Antenna with Adjustable Dipoles

This indoor television antenna is designed to receive over-the-air broadcast signals. Features include adjustable dipoles for VHF reception, a loop antenna for UHF reception, and a tuning knob for fine-tuning the signal.

Product Overview

High-Performance Indoor TV Reception

This indoor television antenna provides a reliable solution for capturing over-the-air broadcast signals in a compact, tabletop form factor. Equipped with both adjustable dipoles for VHF and a specialized loop for UHF reception, it allows users to optimize signal clarity through precise manual adjustments. The unit features a dedicated tuning knob for fine-tuning, ensuring high-quality reception for various digital broadcast channels.
