

Indoor TV Antenna with Amplifier

This indoor TV antenna receives both UHF and VHF signals for over-the-air broadcast channels. It has adjustable antennas and a built-in amplifier to optimize signal reception.

Product Overview

High-Performance Indoor Reception

This indoor TV antenna is engineered to receive both UHF and VHF signals, ensuring access to a wide range of over-the-air broadcast channels. Equipped with adjustable telescopic antennas and a dedicated loop antenna, it provides flexible options for optimal signal acquisition. The integrated amplifier with gain control allows users to enhance weak signals, making it an ideal solution for improving reception in homes, apartments, and office environments.

Technical Specifications

Signal Compatibility	UHF, VHF
Amplification	Yes
Power Supply	AC Adapter
Connection Interface	Coaxial Cable

Design Features

Antenna Components

- Adjustable telescopic antennas
- Loop antenna
- Gain control knob

Application

Recommended Environments

Homes • Apartments • Offices
