

Indoor TV Antenna with VHF/UHF Dipoles

This compact indoor television antenna is designed for receiving over-the-air broadcast signals. It features adjustable dipole antennas for optimizing VHF and UHF frequencies and is mounted on a stable base for tabletop placement.

Product Overview

Compact Indoor Reception Solution

This indoor television antenna is engineered for high-performance reception of over-the-air broadcast signals. Featuring a circular mesh reflector and adjustable dipoles, it is designed to optimize both VHF and UHF frequency capture. This antenna provides a reliable and space-saving solution for accessing local digital and analog television channels without requiring cable or satellite services.

Technical Specifications

Signal Compatibility

- Digital TV
- Analog TV

Supported Frequencies

VHF, UHF

Design and Build

Key Components

- Circular mesh reflector for enhanced signal
- Adjustable dipole antennas
- Stable tabletop base

Installation

Indoor • Tabletop
