

Indoor VHF/UHF TV Antenna

This indoor TV antenna is designed for receiving VHF and UHF signals. It features adjustable dipoles and a circular reflector to optimize signal reception.

Product Overview

High-Performance Indoor Reception

The MDC-3801 electronic gain antenna is specifically engineered for high-quality reception of VHF and UHF broadcast signals. Its design incorporates a circular reflector and adjustable dipoles to ensure optimal signal capture in various indoor environments. With a dedicated tuning knob and power indicator, users can fine-tune reception to enhance over-the-air signal clarity for their televisions.

Technical Specifications

Model Number	MDC-3801
Frequency Bands	VHF, UHF
Signal Type	Electronic Gain

Features

Hardware Components

- Circular reflector
- Adjustable dipoles
- Base unit with tuning knob
- Integrated power indicator

Compliance Status

Indoor Rated
