

Induction Cooktop Set with Ceramic and Metal Cookware

This induction cooktop is compatible with both ceramic and metal cookware, offering flexible cooking options. The set includes a ceramic pot, a soup boiler, and a metal pan.

Product Overview

Versatile Induction Cooking Solution

This induction cooktop set offers exceptional flexibility for professional kitchens and home use by supporting both traditional purple clay cookware and modern metal pans. Equipped with an intelligent cookware identification system, it automatically detects the material type to optimize performance. The set comes complete with a purple clay wok, a purple soup boiler, and a metal pan, providing a comprehensive solution for various cooking methods.
