

Industrial Abrasive Blasting Machine for Surface Preparation

This industrial cleaning machine uses abrasive blasting technology for surface preparation and finishing. It removes contaminants like rust and paint from various workpieces using strategically positioned blast wheels.

Product Overview

Industrial Surface Preparation Solution

This robust industrial abrasive blasting machine is engineered for high-performance surface preparation and finishing. It effectively removes rust, scale, paint, and various contaminants from workpieces using advanced abrasive blasting technology. Designed for durability and consistent quality, it features a fully enclosed blast chamber and a comprehensive abrasive recycling system to ensure efficient, environmentally responsible operation.

Technical Specifications

Construction Material	Heavy-duty steel
Blast Chamber	Fully enclosed
Key Features	Abrasive Recycling System, Media Separator, Dust Collector, Adjustable Blast Parameters

Performance Metrics

Performance Highlights

1 Multiple
Blast Wheels

Applications

Capabilities

- Rust removal
- Scale removal
- Paint stripping
- Surface finishing
