Overview

Industrial Abrasive Blasting Room

The GXX Series is a professional-grade pneumatic conveying and environmentally-conscious sand blasting booth. This comprehensive system integrates a robust steel structure with automated abrasive collection, advanced blasting systems, and a high-efficiency ventilation and dust removal unit. Designed for industrial surface preparation, it ensures a controlled and safe environment for finishing operations.

System Components

Core System Modules

- Steel structure booth
- Automated abrasive-collection system
- Blasting systems
- Ventilation and dust removal system
- Conveyor system
- Electrical control system

Design & Construction

Environmental Features

Dust Collection • Abrasive Recovery • Controlled Environment

Construction Style

Steel Structure, Modular Design, Pneumatic Conveying

Operational Features

Key Operational Metrics

1 Unit

Cell Configuration
