

Industrial Air Compressor

This industrial air compressor is a robust and reliable solution for various compressed air needs. It is designed for continuous operation in demanding environments and provides consistent air pressure for industrial applications.

Overview

Industrial Air Compressor

The LGU series industrial air compressor is a robust and reliable solution engineered for various compressed air needs. It features a durable enclosure with integrated ventilation, specifically designed for continuous operation in demanding industrial environments. The unit includes a digital control panel for precise monitoring and performance adjustments, ensuring consistent air pressure and operational longevity.

Technical Specifications

Series	LGU
Model	LGU22A

Features

Safety Features	Emergency Stop, Digital Control Panel, Integrated Ventilation
-----------------	---

Performance

Operational Mode
Continuous Operation
