

Industrial Air Compressor

This is a large industrial compressor unit designed for heavy-duty applications. It is used in manufacturing or industrial settings requiring high-pressure air compression.

Overview

Industrial Air Compressor

This industrial air compressor is engineered for high-performance, heavy-duty applications in demanding manufacturing and industrial environments. Featuring a robust, durable frame and accessible maintenance panels, it ensures reliable operation and simplified serviceability. The integrated safety cage provides enhanced protection for operators, making it an ideal solution for facilities requiring consistent, high-pressure air compression.

Technical Specifications

Suitable Applications

- Manufacturing facilities
- Industrial air compression
- High-pressure air systems

Model Number

JD31-630

Design Features

Heavy-duty construction, Robust frame, Accessible maintenance panels, Integrated safety cage
