

Industrial Air Compressor

This air compressor is designed for industrial applications. It features a horizontal tank, twin cylinders, a pressure gauge, and a safety valve, and it is mounted on wheels for portability.

Overview

Industrial Performance

The UT55-160 is a robust two-stage air compressor engineered for demanding industrial environments. With a powerful 5.5HP motor and a 160-liter tank, it delivers consistent high-volume airflow of 616 L/min. Designed for reliability and ease of use, this unit features a 12 bar working pressure, making it an ideal solution for heavy-duty pneumatic tools and industrial machinery.
