

Industrial Air Compressor

This air compressor is designed for industrial applications requiring high air volume. It features a control panel for pressure regulation and monitoring, ensuring consistent performance.

Overview

Industrial Air Compressor Performance

This heavy-duty industrial air compressor is engineered for demanding environments that require high air volume and consistent, reliable performance. Featuring a robust construction and a large flywheel, it ensures smooth operation even under continuous load. The integrated control panel allows for precise pressure regulation and real-time monitoring, making it an essential asset for industrial applications.

Technical Specifications

Key Performance Metrics

63 T

Rated Capacity

Model Identifiers

ZDM, JB23-63

Construction & Design

Design Highlights

- Robust heavy-duty construction
- Large flywheel for smooth operation
- Powerful motor for efficient compression
- Sturdy base for operational stability

Control & Monitoring

Control System Features

Pressure Regulation • Monitoring Panel • Industrial Grade
