

Industrial Air Compressor

This high-pressure air compressor features a multi-cylinder design and durable construction. It is suitable for industrial applications requiring a reliable and efficient source of compressed air.

Product Overview

Industrial Performance

This high-pressure industrial air compressor is engineered for demanding environments requiring a reliable and consistent compressed air source. Featuring a robust, multi-cylinder construction, it is specifically designed to support continuous operation. Its efficient design ensures stable air delivery for various heavy-duty industrial applications.

Technical Specifications

Operational Mode

Continuous Duty • High Pressure

Model Designation

NPT5 / 3W/1.6

Construction Type

Multi-cylinder

Applications

Suitable Applications

- Industrial Manufacturing
- Heavy-duty pneumatic systems
- Continuous process operations
