

Industrial Air Compressor

This compressor is designed for heavy-duty industrial applications. It features a robust frame, precision controls, and a powerful motor for efficient operation.

Overview

Industrial Performance

This heavy-duty air compressor is engineered for demanding industrial environments, featuring a robust frame and precision controls. Designed for high performance and reliability, it utilizes a powerful motor to ensure efficient operation across various applications. The JZ25-110 and ZDM series are built to withstand rigorous daily use in professional settings.

Technical Specifications

Durability

Heavy-Duty • Industrial Grade

Model Series

JZ25-110, ZDM

Key Features

Key Features

- Robust structural frame
- Precision control interface
- High-efficiency motor
- Optimized for demanding environments
