

Industrial Air Compressor for Packaging Machinery

This air compressor is designed for industrial applications, especially in the packaging machinery sector. It features a horizontal air tank, electric motor, and reciprocating pump, integrated into a mobile unit for easy maneuverability.

Overview

Industrial Air Compressor for Packaging Machinery

This robust and reliable air compressor is engineered specifically for industrial applications within the packaging machinery sector. Featuring a horizontally mounted air tank and a high-efficiency reciprocating pump mechanism, it delivers consistent pneumatic power for packaging processes. The unit is designed for durability and mobility, making it an essential asset for workshop or factory environments requiring dependable air delivery.

Technical Specifications

Key Components

- Pressure gauge
- Safety valve
- Air outlet valve
- Electric motor

Design Type

Reciprocating compressor with horizontal air tank

Mobility Features

Wheeled base, Compact design, Maneuverable

Performance Metrics

Rated Capacity

340 L/min

Capacity

Construction

Corrosion Resistance

Durable coating
