

# Industrial Air Compressor with 88L Tank

This air compressor has a tank capacity of 88L and operates at a pressure of 8Bar (115Psi). It delivers a capacity of 646L/min (22.8C. F. M) with a 4KW/5.5HP motor.

## Overview

### Industrial Performance Overview

This industrial-grade air compressor is engineered for reliability and consistent output in demanding work environments. With a robust 4KW motor and an 88L tank, it delivers a high air capacity of 646L/min, making it suitable for various industrial applications. Its durable construction and mobile design ensure it can handle heavy workloads while remaining easy to position where needed.

## Technical Specifications

### Power Output

**4 kW**

Power (KW)

**5.5 HP**

Power (HP)

### Operating Pressure

**8 Bar**

Pressure

**115 Psi**

Pressure

### Air Delivery Capacity

**646 L/min**

Capacity

**22.8 CFM**

### Mechanical Details

Feature	Specification
Model	V-0.6/8
Piston Configuration	90mm x 2
Rotational Speed	830 R.P.M
Tank Volume	88 L

## Physical Dimensions

**Dimensions** 113cm (L) x 43cm (W) x 87cm (H)

## Certifications

**Compliance & Standards** CE, ISO 9001:2008
