

Industrial Air Compressor with Metallic Cylinder Head

This air compressor is designed for industrial applications. It features a metallic cylinder head and black-finished body, providing compressed air for pneumatic systems.

Overview

Industrial Performance

This heavy-duty air compressor is engineered for demanding industrial environments. Featuring a robust metallic cylinder head and a durable black-finished body, it is built to withstand rigorous daily use. It provides a reliable source of compressed air, making it an essential component for various pneumatic systems and industrial machinery.

Construction

Design

Heavy-duty • Industrial Grade

Cylinder Head Material	Metallic
Body Finish	Black-finished

Application

Suitable Applications

- Pneumatic systems
- Industrial machinery
- Demanding environments
