

Industrial Air Conditioning Unit

This high-performance air conditioning unit is designed for industrial or commercial applications. This robust system efficiently manages temperature and humidity, ensuring optimal conditions for sensitive equipment and processes.

Product Overview

Industrial Cooling Solution

This industrial air conditioning unit is engineered for demanding environments such as steel mills, metallurgy, and dyeing facilities. It provides precise climate control to ensure optimal operating conditions for critical infrastructure and sensitive equipment. With multiple capacity configurations available, this robust system is designed for reliability and consistent performance in high-heat industrial settings.

Technical Specifications

Cooling Capacity

3.5 kW

Model 35L

4 kW

Model 40L

5 kW

Model 50L

Operating Temperature Range

20 - 75 °C

Available Models

NBTHK-35L, NBTHK-40L, NBTHK-50L

Applications

Suitable Industries

- Metallurgy
- Steel Mills
- Dyeing Facilities
