

Industrial Air-Cooled Condenser

This air-cooled condenser is designed for industrial refrigeration. It features robust construction with circular fan openings for optimal airflow and heat exchange.

Product Overview

Industrial Air-Cooled Condenser

This high-efficiency air-cooled condenser is engineered specifically for demanding industrial refrigeration applications. Featuring a robust construction with multiple circular fan openings, it is designed to deliver optimal airflow and superior heat exchange performance. Its compact, modular design ensures reliable operation, flexible installation, and ease of maintenance in professional environments.

Technical Performance

Compatible Refrigerant
R404A

Condensing Temperature 40 °C

Ambient Temperature 25 °C
