

Industrial Air Curtain for Refrigeration

This industrial air curtain is designed for refrigeration and ventilation applications. It features a white metal housing with a grille for air intake and adjustable vanes for directing airflow.

Product Overview

Industrial Air Curtain for Refrigeration

This industrial-grade air curtain is specifically engineered for refrigeration and ventilation applications, providing an efficient barrier to maintain temperature stability. Housed in a durable white metal casing, the unit features an integrated intake grille and precision-adjustable vanes to optimize airflow direction. It is an ideal solution for commercial environments where consistent climate control and air circulation are critical for operational efficiency.

Design and Construction

Housing Material	White metal
Airflow Control	Adjustable vanes

Applications

Suitable Environments	Refrigeration, Ventilation, Commercial Cooling
