

Industrial Air Dryer for Compressed Air Systems

This industrial air dryer removes moisture from compressed air systems. It features a control panel, pressure gauge, schematic diagram, and ventilation grilles for cooling.

Overview

Industrial Air Dryer for Compressed Air Systems

This industrial air dryer is expertly designed to effectively remove moisture from compressed air systems, ensuring the longevity and reliability of downstream pneumatic equipment. It features an intuitive control panel equipped with a pressure gauge and a clear schematic diagram of the air drying process for easy monitoring. Built for efficient operation, the unit includes integrated ventilation grilles to maintain optimal cooling during heavy-duty industrial applications.

Technical Specifications

Model Capacity	7.5 kW
----------------	--------

Certifications

Compliance Standards	ISO 9001
----------------------	----------

Key Features

System Features

- Integrated pressure gauge
- Air drying process schematic display
- Optimized ventilation cooling system
- Industrial-grade moisture removal
