

Industrial Air Filter Assembly

This heavy-duty air filter assembly is designed for industrial machinery applications. It includes a cylindrical air filter element housed in a metal casing, ensuring efficient filtration and noise reduction.

Overview

Industrial Air Filtration Solution

This heavy-duty air filter assembly is engineered specifically for demanding industrial machinery environments. The unit integrates a high-efficiency cylindrical air filter with a robust noise-reduction silencer, mounted together on a durable metal stand. Designed for longevity and consistent performance, it ensures optimal air quality and operational noise control for your equipment.

Design & Construction

Construction Materials	Durable Metal, Heavy-duty Casing
Mounting Configuration	Integrated metal stand
Securing Method	Wing nut

Key Features

Core Functions

- Efficient Air Filtration
- Noise Reduction
- Silencing

Integrated Components

Cylindrical Filter Element • Rectangular Silencer • Curved Exhaust Pipe
