

Industrial Air Filter

This air filter is designed for industrial and commercial applications. It effectively removes particulate matter from the air, improving air quality.

Product Overview

Industrial Air Filtration Solution

This industrial air filter is engineered to maintain optimal air quality in demanding environments. Designed for efficiency and reliability, it effectively captures airborne contaminants to ensure a safer and cleaner workspace. Its robust construction makes it suitable for continuous operation in various industrial settings.

Technical Specifications

Filtration Efficiency	99.9 %
Operating Modes	Continuous, Intermittent, Auto-Sensor

Key Performance Metrics

Performance Metrics

1500 m³/h
Air Flow Rate

65 dB
Noise Level

Compliance and Standards

Certifications

ISO 9001 • CE Certified • RoHS Compliant
