

Industrial Arc Welding Machine

This heavy-duty industrial welding machine is designed for professional welding applications. It features a robust construction with a durable enclosure and integrated cooling vents.

Product Overview

Professional Industrial Arc Welding Machine

The HC650 is a heavy-duty industrial welding machine engineered for demanding professional welding applications. Designed for maximum reliability, the unit features a rugged construction with a durable protective enclosure and integrated cooling system to support high-duty cycles. With precise digital monitoring of voltage and current, this machine offers the accuracy and portability required for efficient workshop operations.

Technical Specifications

Model Number	HC650
Welding Processes	Arc Welding

Operational Features

Control Interface

- Digital voltage display
- Digital current display
- Precise manual adjustment knobs

Design and Portability

Mobility

Integrated wheels • Workshop mobile

Construction Details

- Heavy-duty industrial enclosure
- Integrated cooling vents
