

Industrial Auto Engine

This auto engine is a reliable power source suited for industrial and automotive use. It features a durable construction that ensures consistent performance and longevity.

Product Overview

Industrial Auto Engine

This direct injection diesel engine is engineered for high stability and efficiency in industrial applications. Featuring a compact structure and Italian-style output shafts, it provides reliable power while maintaining a low noise profile. With dual starting capabilities, it offers versatile performance for professional requirements.

Performance Metrics

Max Power Output

6 hp

Max Power

Operational Data

Metric	Value
Displacement	296 cc
Continuous Power	5.0 hp / 3600 rpm
Fuel Consumption	215 g/hp.h
Noise Level (7m)	95 dB

Technical Specifications

Build Characteristics

- Direct injection combustion system
- Forced-air cooling system
- Forced lubrication via trochoids pump
- Mechanical all-speed governor

Dimensions and Weight

- Bore x Stroke: 78x62 mm
- Dimensions: 492x475x537 mm
- Recoil Dry Weight: 36 kg
- Electric Dry Weight: 41 kg

Key Features

Italian Type Output Shaft, Electric Starter, Recoil Starter, Compact Design
