

Industrial Axial Fan 500FZL-50

This axial fan is designed for industrial applications requiring efficient airflow. It features robust construction and aerodynamically optimized blades suitable for ventilation and cooling.

Overview

High-Performance Industrial Ventilation

The 500FZL-50 is a robust axial fan engineered for demanding industrial environments, including apparel and textile machinery. It features aerodynamically optimized blades and a balanced impeller to ensure efficient, smooth, and reliable airflow for cooling and ventilation tasks. Designed for longevity and ease of use, this fan incorporates durable materials and a protective wire guard to withstand rigorous operational conditions.

Performance Metrics

Model Number	500FZL-50
Primary Applications	Industrial Ventilation, Cooling Systems, Air Circulation, Textile Machinery, Apparel Machinery

Design & Construction

Design Features

- Protective wire guard
- Aerodynamically optimized blades
- Balanced impeller for smooth operation
- Durable industrial-grade materials

Maintenance

Easy Installation • Low Maintenance
