

# Industrial Axial Fan

This axial fan is designed for efficient air movement. It features a robust construction with a circular frame and safety grille and is suitable for various ventilation and cooling applications.

## ADDITIONAL IMAGES

## Overview

### Industrial Axial Fan

These industrial axial fans are engineered for applications requiring high-volume, low-pressure airflow. Designed for general-purpose ventilation and cooling, they balance exceptional energy efficiency with low operational noise levels. With a maximum air volume capacity of up to 9000 m³/h, these units provide reliable performance for diverse industrial environments.

## Performance Metrics

### Maximum Air Volume

**9000 m³/h**  
Max Air Volume

### Rotation Speed

1400 RPM

## Technical Specifications

### Model Specifications

Model	Current (A)	Power (W)	Air Volume (m³/h)
GFZ40A	1.343	300	5200
GFZ50A	1.77	450	8500
GFZ40B	0.76	200	4300
GFZ50B	0.76	250	6300
GFZ60B	1.78	400	9000

### Available Models

- GFZ40A
- GFZ50A
- GFZ40B
- GFZ50B
- GFZ60B

### Electrical Parameters

220V, 50Hz
