

Industrial Axial Fan for HVAC and Cooling

This industrial axial fan is designed for refrigeration and ventilation applications. It features a robust cylindrical housing and is suitable for high-volume air movement in industrial settings.

Product Overview

Industrial-Grade Airflow Solution

This industrial axial fan is specifically engineered for high-volume air movement in demanding HVAC and cooling environments. Designed with a robust cylindrical housing and a durable impeller, it ensures reliable performance for refrigeration and heavy-duty ventilation tasks. Its stable, sturdy base mount allows for straightforward installation in cooling towers and industrial ventilation systems.

Technical Specifications

Design Features

- Robust cylindrical housing
- High-performance red impeller
- Durable gray exterior coating
- Sturdy base for stable mounting

Application Fields

HVAC Systems, Cooling Towers, Refrigeration, Industrial Ventilation
