

Industrial Axial Fan for Textile Machinery

This industrial axial fan is designed for apparel and textile machinery applications. It features multiple blades within a square frame for efficient air movement and ventilation.

Product Overview

Industrial Performance for Textile Machinery

This industrial axial fan is engineered specifically for the rigorous demands of apparel and textile machinery environments. Featuring a robust square mounting frame with pre-drilled holes, it ensures straightforward installation and secure operation. Its multi-blade design optimizes air movement and ventilation, providing reliable cooling and airflow in demanding industrial settings.

Physical Characteristics

Mounting Type	Square mounting frame
Installation	Pre-drilled holes, Easy installation

Design & Construction

Primary Application

Apparel Machinery • Textile Machinery • Industrial Ventilation

Blade Design	Multiple blade configuration
Durability	Yes
