

Industrial Axial Fan with Protective Grille

Axial fan features aerodynamic blades for efficient air movement. A robust protective grille enhances safety and ensures durability.

Overview

High-Efficiency Industrial Cooling

The Industrial Axial Fan with Protective Grille is engineered for high-performance air movement in demanding environments. Featuring an aerodynamic blade design, it optimizes airflow while maintaining low noise levels for efficient ventilation. Constructed with high-quality materials, this fan ensures long-term durability and resistance to environmental factors in various industrial settings.

Key Performance Metrics

Performance Highlights

600 mm

Blade Diameter Class

Design & Construction

Blade Characteristics

- Aerodynamic blade profile
- Optimized for high airflow
- Noise-minimizing geometry
- Durable construction materials

Safety & Protection

Safety Features

Protective Grille • Industrial Grade • Environmental Resistance

Applications

Ideal Applications

Cooling Systems, Industrial Ventilation, Air Circulation, Factory Cooling
