

Industrial Axial Ventilation Fan

This industrial axial fan is designed for exhaust and ventilation applications. It features a robust circular frame with pre-drilled mounting holes and four red-painted blades optimized for high airflow.

Overview

Industrial Axial Ventilation Fan

This industrial axial fan is engineered for high-performance exhaust and ventilation applications in commercial and industrial environments. Featuring a robust circular frame with pre-drilled mounting holes, it ensures straightforward installation and long-term durability. The unit is equipped with four high-efficiency red-painted blades driven by a centrally mounted motor, designed specifically to optimize airflow and maintain reliable operation.

Technical Specifications

Blade Color

Red

Blade Count

4 blades

Design & Construction

Frame Design

Robust circular frame

Installation

Pre-drilled mounting holes, Easy installation

Performance

Primary Applications

- Industrial ventilation
- Exhaust systems
- Commercial air circulation
