

Industrial Ball Valve

This ball valve is designed for demanding industrial applications. It features a robust construction ensuring reliable operation and long service life, suitable for various fluids and pressures.

Product Overview

Industrial Ball Valve

This high-performance ball valve is engineered for demanding industrial water management applications. With a robust construction designed for long service life, it offers reliable operation under significant pressure. This valve is suitable for large-scale infrastructure, supporting nominal diameters up to DN 3000.

Technical Specifications

Nominal Diameter Range	DN 500 – DN 3000
Maximum Operating Pressure	10 MPa
Maximum Temperature	65 °C

Usage Details

Primary Application	Water
Customization Options	Higher temperature, pressure, and other media compatibility available upon request.
