Overview

Industrial Ball Valve Series

This comprehensive range of industrial ball valves offers versatile solutions for fluid control, featuring 2-piece and 3-piece designs in both cast and forged steel configurations. Engineered for reliability, these valves include safety features such as blow-out proof stems, anti-static devices, and optional anti-fire protection. With a wide variety of materials, pressure ratings, and connection types, these valves are suitable for diverse industrial piping applications.

Technical Specifications

Body Materials

- CF8M
- CF8
- WCB
- LCC
- AISI316
- AISI304
- A105
- LF2
- A108
- F321

Seat Materials

PTFE • R-PTFE • PPL

Available Configurations

2-Piece Design, 3-Piece Design, Full Port, Cast Iron, Forged Steel

Performance & Standards

Pressure Ratings

- Class 150
- Class 300
- Class 800
- Class 1500
- Class 2500
- 1000 PSI (PN63)
- 2000 PSI (PN63)

Size Range

1/4" to 10"

End Connections

Flange (ANSI B 16.5), BSP, NPT, DIN2999, SW

Features & Options

Safety & Operational Features

- Blow-Out Proof Stem
- Anti-Static Device
- Anti-Fire Device
- Padlocking / Locking Device
- ISO5211 Mounting Pad
