

Industrial Band Saw with Carriage

This industrial band saw features a 54-inch carriage combination. It is designed for precise cutting and shaping of logs in high-volume wood processing environments.

Overview

Industrial Band Saw with Carriage

This industrial band saw is engineered for high-volume wood processing within demanding manufacturing environments. Featuring a robust horizontal carriage system, it enables precise log movement through the cutting blade for consistent shaping and sizing. Equipped with integrated control panels and essential operator safety features, this machine is designed to optimize efficiency in lumber mill operations.

Technical Specifications

Machine Type	Industrial Horizontal Band Saw
Primary Application	Log Processing, Lumber Milling, High-Volume Production

Features

Key Features

- Horizontal carriage system for precise log feeding
- Integrated operator control panel
- Enhanced operator safety systems
- Heavy-duty construction for industrial use

Safety Compliance

Industrial Grade • Safety Certified
