

Industrial Band Saw

Industrial band saws are used for cutting metal materials in manufacturing and fabrication processes. These machines feature a continuous band blade for efficient and precise cuts.

Overview

High-Performance Industrial Band Saw

Designed for demanding metalworking environments, this industrial band saw offers precision and reliability for heavy-duty cutting applications. Featuring robust construction and hydraulic controls, it is engineered to handle continuous operation on the factory floor. This machine provides clean, accurate cuts across a variety of metal profiles, making it an essential asset for manufacturing and fabrication facilities.

Key Features

Capabilities

Metal Cutting, Industrial Grade, Hydraulic Operation, Heavy-Duty

Technical Specifications

Build Materials

- Reinforced Steel Frame
- Hydraulic Components
- Industrial Grade Blade Housing

Color

Orange • Gray

Machine Type

Industrial Band Saw
