

Industrial Bearing Unit

These bearing units have robust housings and high-quality bearings to ensure reliable performance and long service life. Available in multiple mounting configurations, the bearings are pre-lubricated and sealed to protect against contamination, reducing maintenance.

Product Overview

Industrial Bearing Solutions

These standard bearing units provide a comprehensive range of inserts and housings engineered for durability and consistent performance in demanding industrial environments. Designed for versatility, the collection includes various mounting configurations such as pillow blocks, flanges, and take-up units, all featuring pre-lubricated seals to minimize maintenance. These units are essential for reducing friction and supporting rotating shafts in diverse machinery, including conveyors, fans, pumps, and gearboxes.

Technical Configuration

Housing Configurations

- Pillow Blocks (UCP, UCPK, UCPX, HCP, HCPK, SAP, SAPK, SBP, SBPK)
- Tapped Base (UCPA, HCPA, SAPA, SBPA)
- 2 Bolt Flanges (UCFL, HCFLU, SAFL, SBFL, SAFTD, SBFTD)
- 3 Bolt Flanges (UCFB, HCFB, SBFCT, SAFCT)
- Piloted Flanges (UCFC)
- Take Ups (UCST, HCST, UCTRS, HCTRS)
- Hanger Units (UCHA, HCHA)

Available Insert Series

UC, HC, SA, SB, SER

Product Features

Design Advantages

Pre-lubricated • Sealed construction • Cast iron or steel housing • Robust design • Low maintenance
